

# Proportional Valve Tester PVT-2

**PAWTAWJOHN**  
**SERVICES, INC**

## Description

(PVT - 02) is an in-line electrical monitor for proportional hydraulic valves with on-board electronics. It is designed to monitor those voltages which can affect the control of proportional hydraulic valves in a hydraulic system. Configured for industry standard proportional valves (Bosch, Rexroth) operating on 24VDC, a  $\pm 10$ VDC command signal.

## Features

- In-Line Proportional Valve Tester Uses System Power
- Tests Proportional Valves with On Board Electronics (OBE)
- Limited Capability for External Drive Valves
- Jog Forward and Reverse
- External Command of Valves or Monitor While in Use
- Monitors Supply Voltage, LVDT Feedback and Command Voltages
- Optional Carry-Case Available
